# Introduction

## What does it do?

– Adds an extra Edit Icon to listmodule, so you can edit multiple fields in multiple records in one step.

## Screenshots

The screenshot displays the TYPO3 list module interface. At the top, a header bar shows 'Page Content (7)' and a toolbar with various icons. A red box highlights the 'Edit' icon (a pencil) in the toolbar. Below the toolbar is a table with 7 records. The table has columns for 'Header:', 'Ref', 'Language:', 'Layout:', 'Align:', and 'Type:'. Records 2, 4, and 6 are selected, indicated by blue checkmarks in the 'Ref' column. Below the table is a sidebar with a list of fields: Type, Hide, Start, Stop, Access, Language, Transl.Orig, Layout, Columns, Date, Header, Align, Link, and Type. The 'Set fields' button is visible next to the list.

	Header:	Ref	Language:	Layout:	Align:	Type:
1 Th...			Default	Default	Default	Layout 1
2 Th...		<input checked="" type="checkbox"/>	Default	Default	Default	Default
3 Th...			Default	Default	Center	Layout 2
4 Th...		<input checked="" type="checkbox"/>	Default	Default	Default	Layout 3
5 Th...			Default	Layout 1	Default	Layout 4
6 Th...		<input checked="" type="checkbox"/>	Default	Layout 2	Right	Layout 5
7 Th...			Default	Layout 3	Default	Hidden

In his example you set the Fields "Language", "Layout", "Align" and "Type" and choose the marked records 2,4 and 6. With the new Edit Icon you can edit all set fields for the marked Records in one step.

# Users manual

- Go to the list module
- use "Extended view " and "Show clipboard "
- in the clipboard use one "Clipboard x" not the "Normal"
- choose your needed Fields and press "Set Fields"
- mark some records and use the new Edit Icon
